# DESIGN TO PLAY

.....

# About us

*Rafa-kids* originated from  
the shared dream of two architects  
- **Agata and Arek Seredyn**.

The world of designing for children  
opened up to them after the arrival of their  
two sons, **Frank and Robert**. They wanted  
to design high quality and good looking  
products for them. That is how the first bed  
for their older son was born. After making  
it they received so many nice reactions  
and requests that , Agata and Arek  
decided to realise the dream of starting  
a small company.

It is called Rafa after first letters of  
all family members. Rafa-kids' mission is  
to design **products that encourage play,  
creativity and beauty.**

Let's play with them!

A close-up photograph of the 'K desk' made of light-colored wood. The desk has a unique, sculptural design with a curved top and a thick, angled leg. A white, cloud-shaped text box is overlaid on the image, containing text about the desk's design. An arrow points from the text box to the desk's leg.

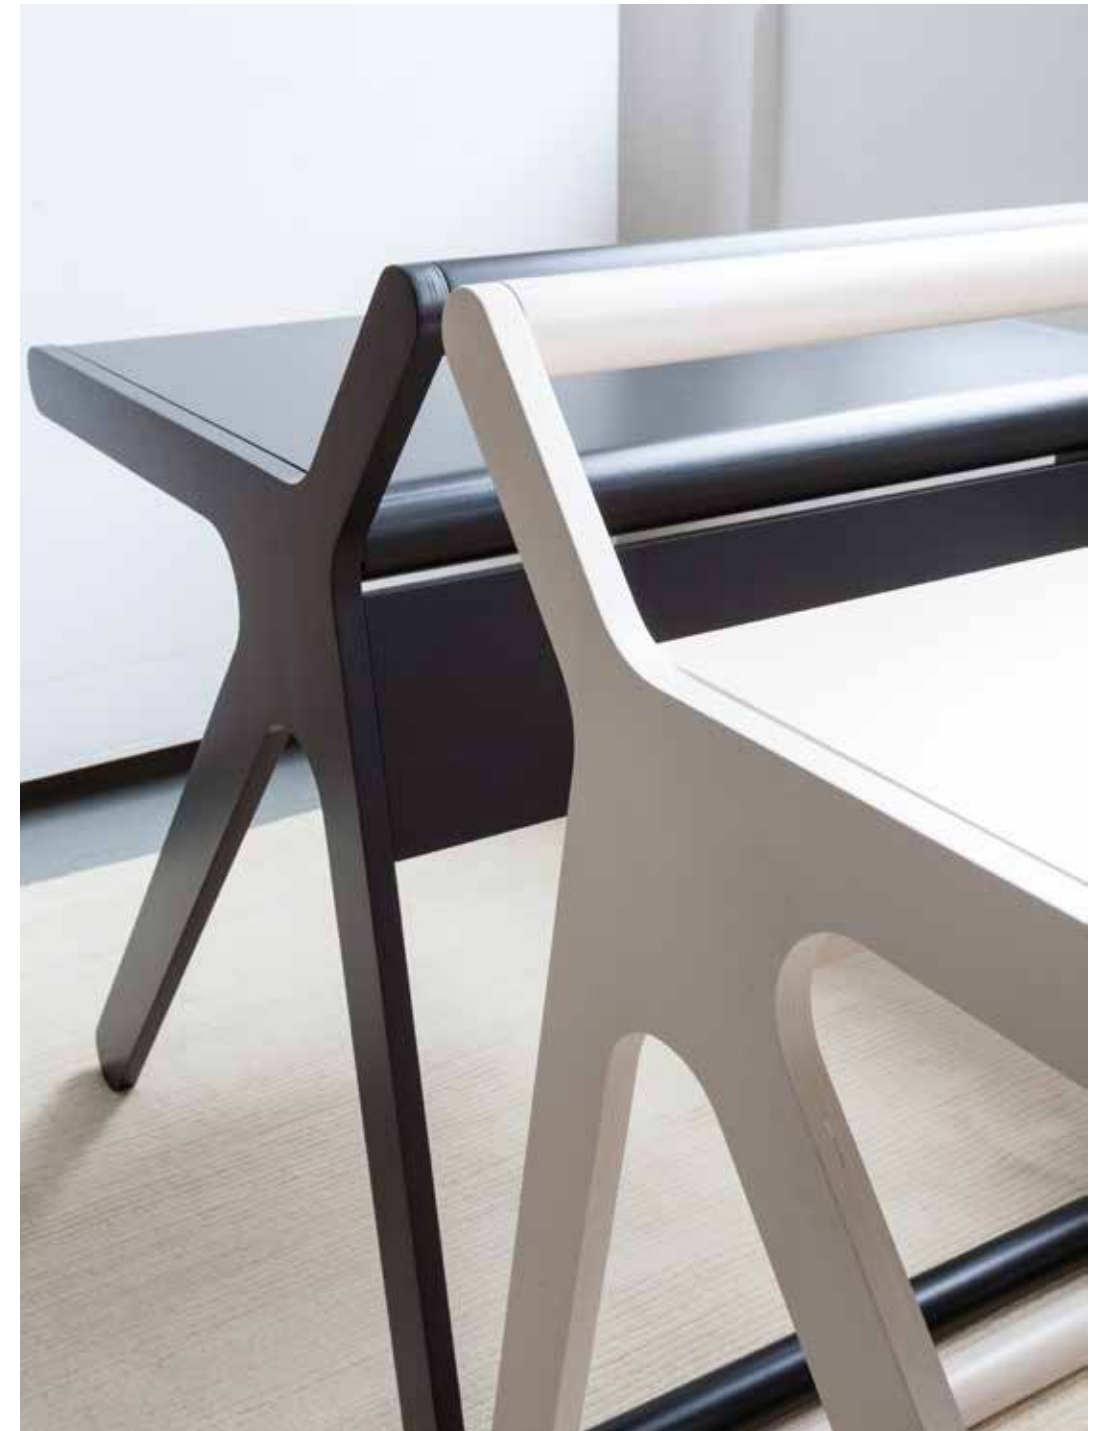

*Rafa-kids* is glad to present  
imaginary and playful K desk.  
We designed this stable and functional  
desk without compromising  
its beauty.

We know well that moment in time when a child is outgrowing his crib is a huge step in his life. That's why we created a bed that encourages child's independence and also stimulates his growth through play. We see a child's bed not only as a place to sleep but also as a challenging and beautiful element of his room.

So here we go! • • • • •
